

Photobook Creator

Quick Start Guide

Once you have downloaded the **FREE** Vanilla Photobook Creator software, follow our quick start guide below, which shows how easy it is to create a photobook.

START HERE!

Ensure that you have your folder of digital photos ready on your computer.

Launch the Vanilla Photobook Creator software and click the **Create a New Project** button.

Click the **Check For Updates** button and download any updates that are available.

Choose a photobook format from the list and click the **Next** button.

You can adjust the layout, add text / backgrounds etc using the functions shown.

Autoflow your images into the template using the **+** button.

Add your photos to the image library by clicking the **+** button in the pictures tab.

Give your project a name and click the **Create** button.

Now scroll down to see the final step!

DOUBLE CLICK picture to adjust crop & **RIGHT CLICK** for more options

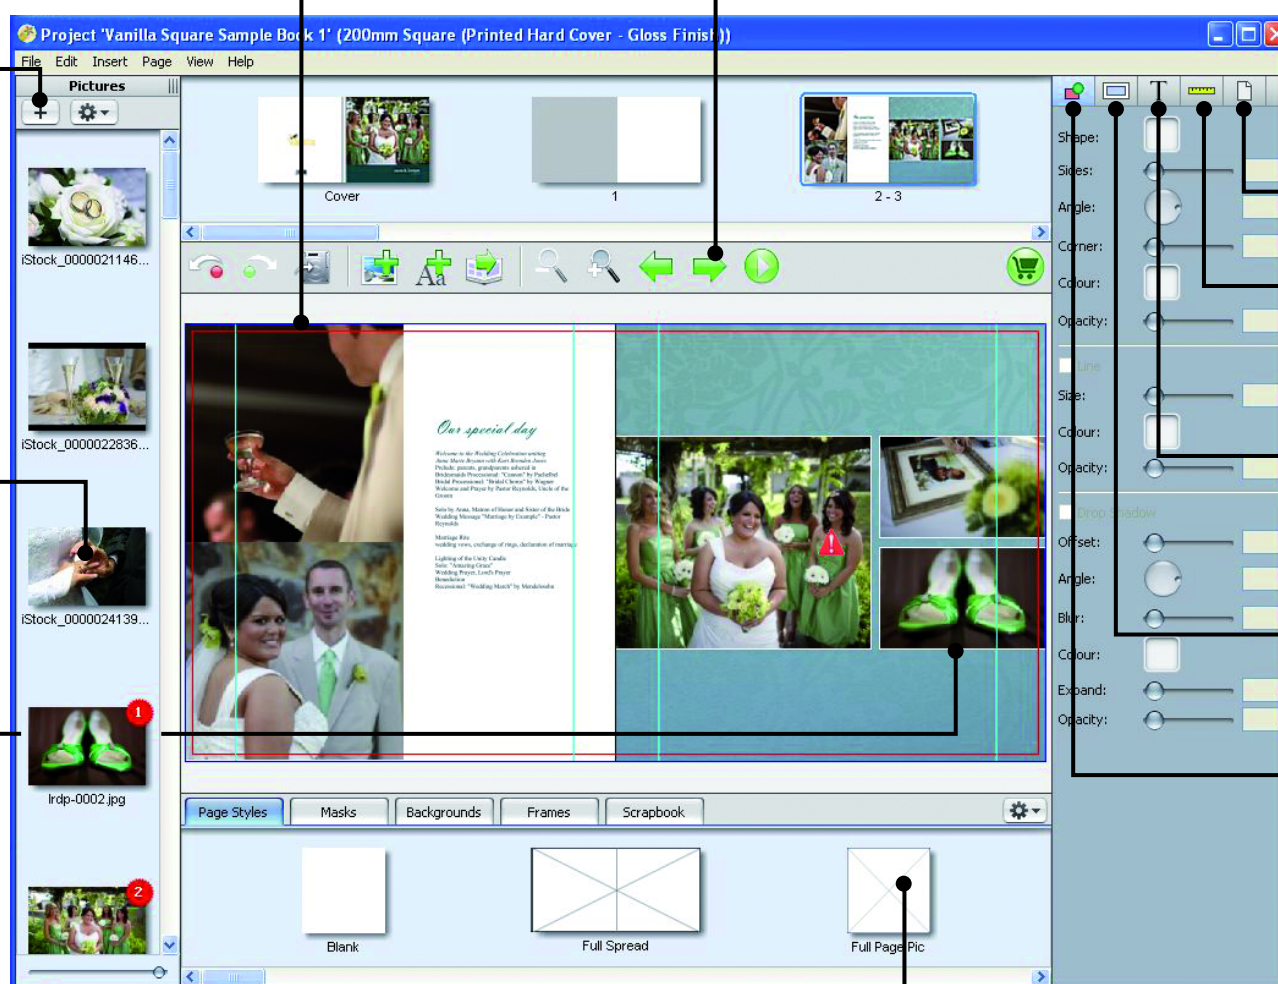

CLICK arrows to go to next/previous page or spread

ADD your photos to the image library.

RIGHT CLICK to: rotate, remove, etc

DRAG & DROP pictures onto the page

DRAG & DROP Page Styles, Masks, Backgrounds & Scrapbook items onto the page

TIP: Right click on PC = ctrl click on MAC

FINAL STEP!
ORDER YOUR PHOTOBOOK

When you have finished your design, click the **'Shopping Basket'** button to order your photobook. The software will check and prompt you for errors such as low-res images, blank pages and empty text boxes. You will then proceed to a secure site for you to sign in to an existing account or create a new one, select product and shipping options and pay for your product. Once you complete the online process, be sure to complete the uploading process in the Photobook Creator software itself.
