

WARNING: We recommend that you duplicate your project first, before going through this process.

In the software, when you open your existing project there should be a symbol like this one. Click on it.

Once you have clicked on the symbol this box should come up. This shows that you can convert your book into any of our square albums **excluding the Wedding Albums and the VIP Mini Books.** Click on the one you would like and let it load. Make sure you double check your project before ordering. Any self-made and imported masks and backgrounds may not have transferred to the new size. Always check your project before printing.
