

# How to Change the Page Colour in the Vanilla Photobooks Software

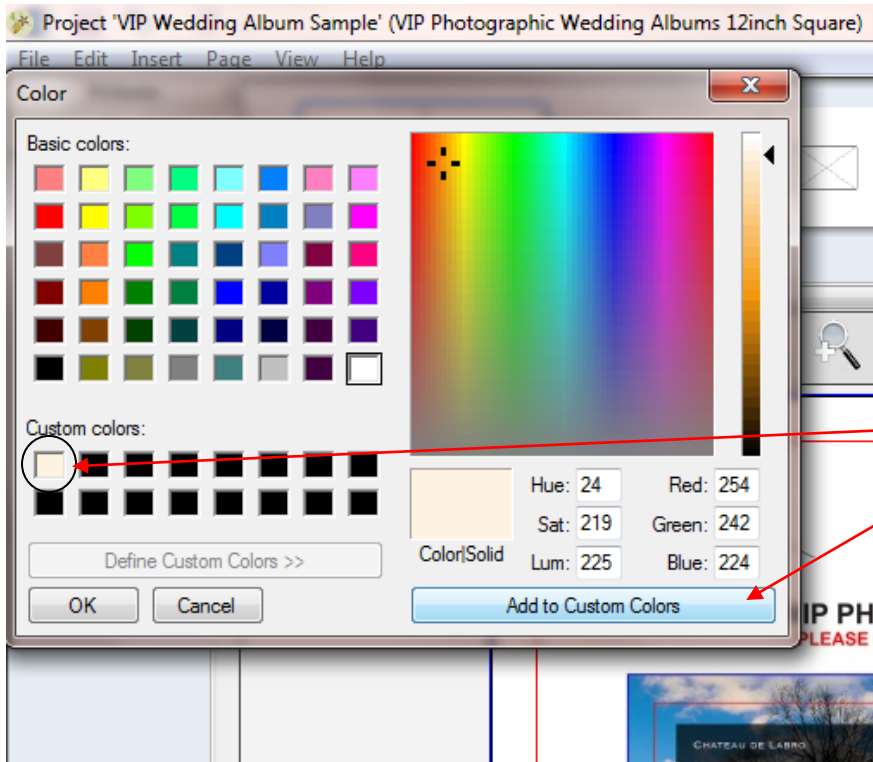

Click on this button to bring up a page that allows you to change the colour of the left and right pages of the spread you are on individually.

This will give you block colours as opposed to the other options of having picture backgrounds.

Then click on the white square to see a range of colours to choose from.

However if you would like a more specific colour for your background, then click on 'Other...'

Once you have clicked on 'Other...' this box will appear. Here you can choose from a wider variety of colours.

To save your selected colour click 'Add to Custom Colours'. This will put the colour in the 'Custom colours' section for easy access throughout your creation process.
