

How to Add and Categorise your Image Backgrounds in the Vanilla Photobooks V5 software

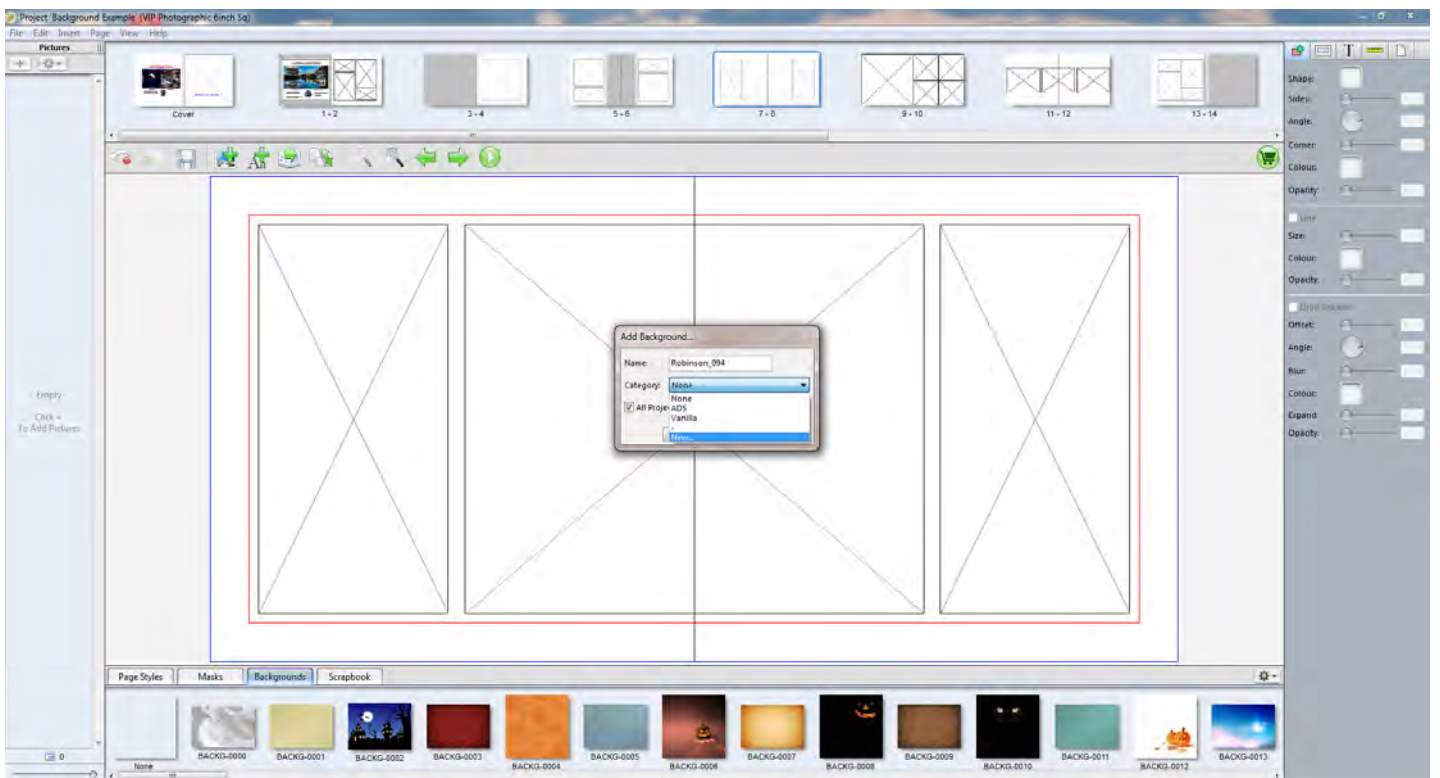

To Add an image background to the software, click on the grey clog symbol and select 'Add'.
If you would like your backgrounds to be more easily accessible follow the rest of the guide.

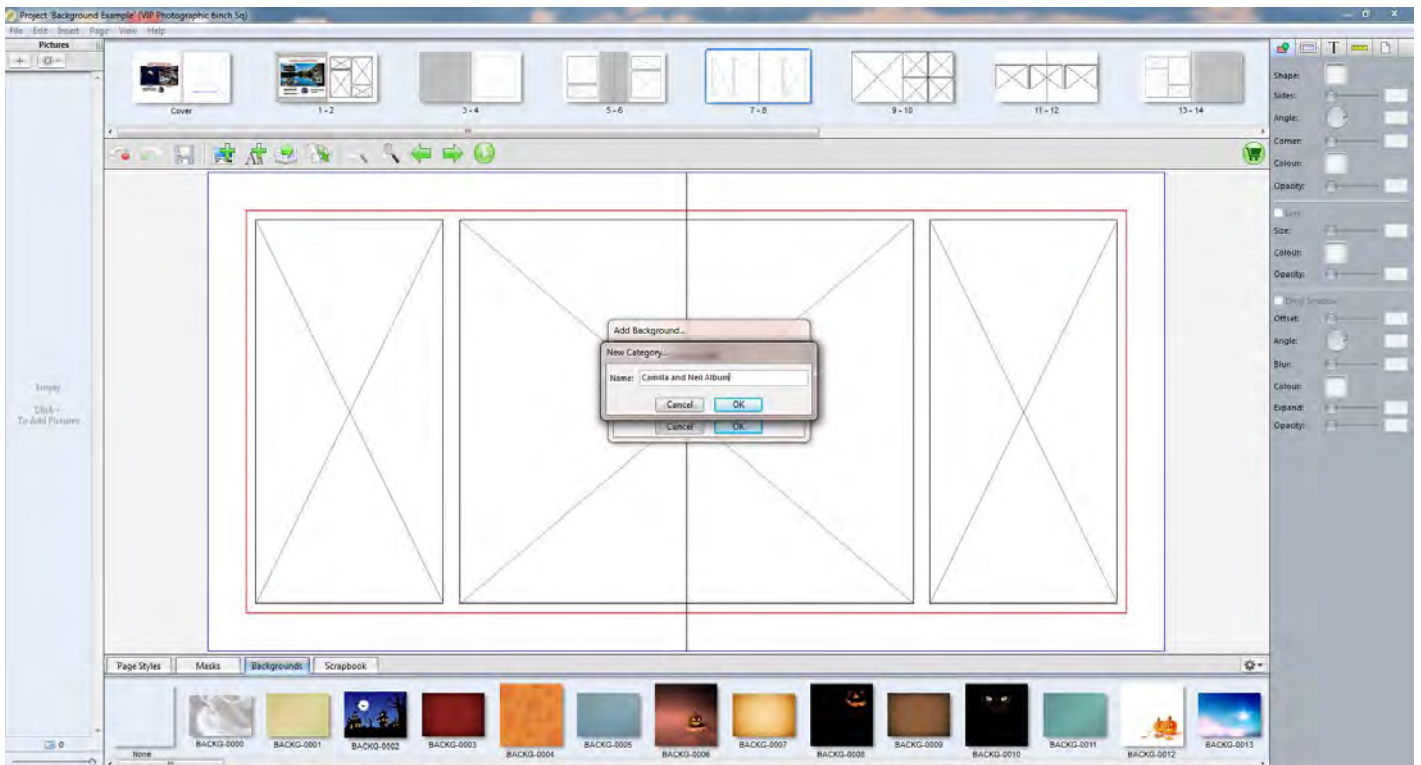

Select the image/s you would like to add and select 'Open'

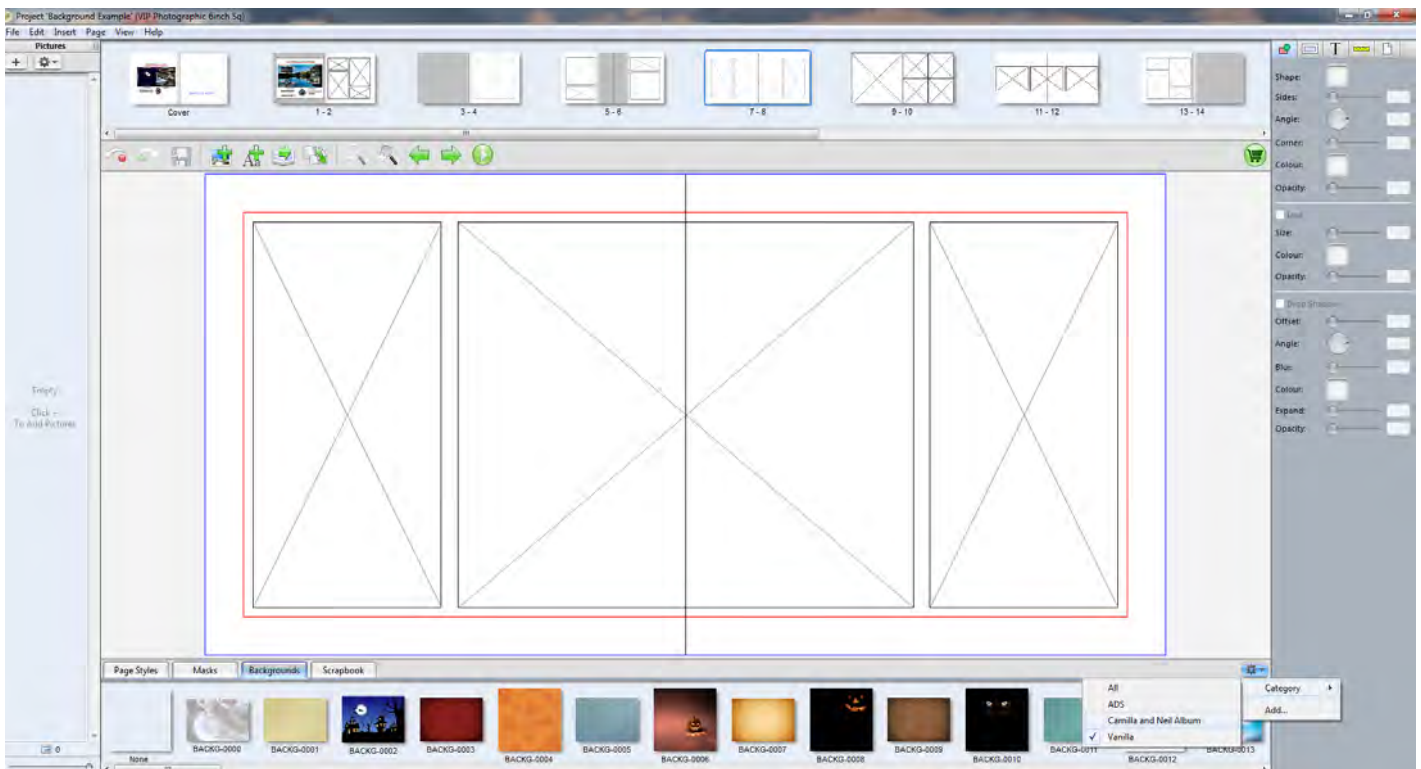

This small window will pop up. Here you can create or select a Category and rename your background.

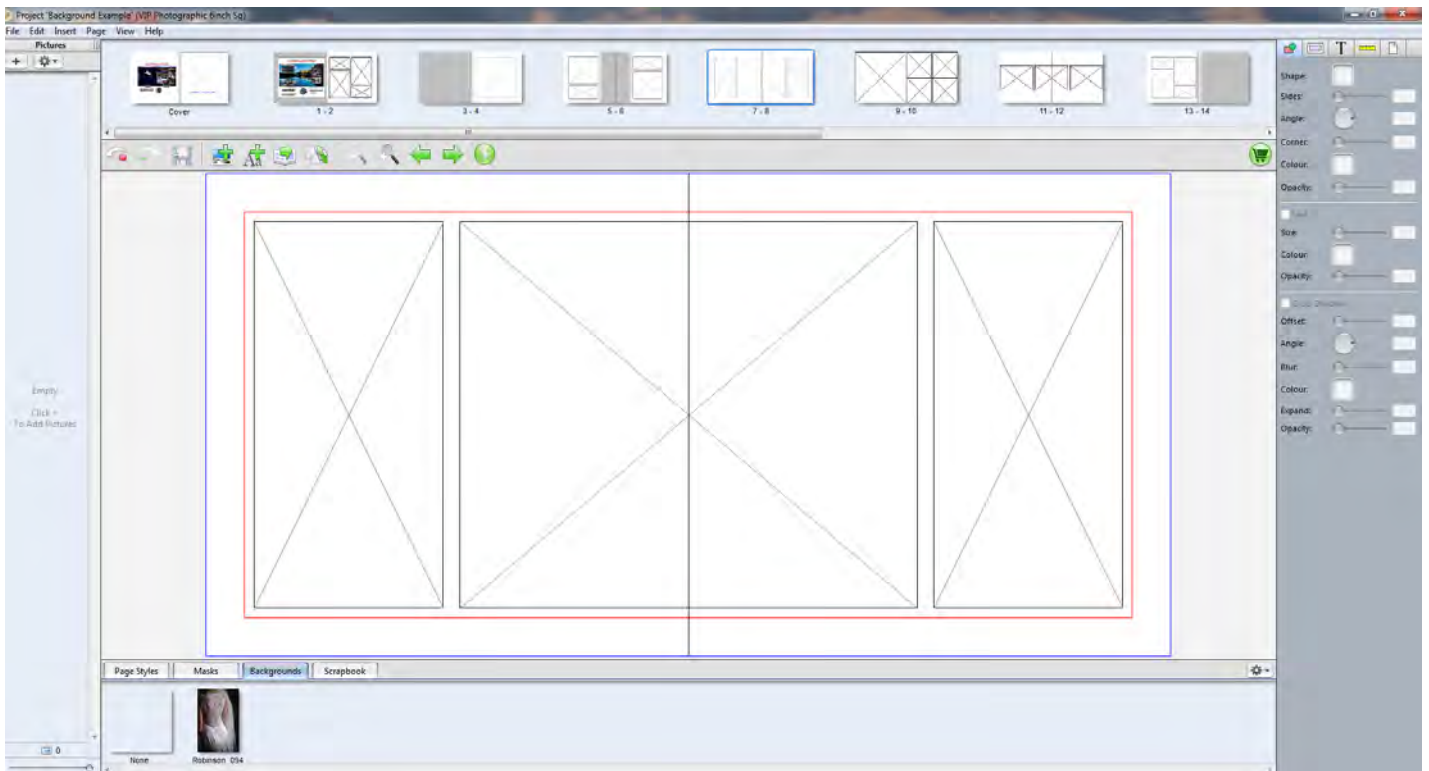

To create a new category, select 'Category' and 'New' within the window.

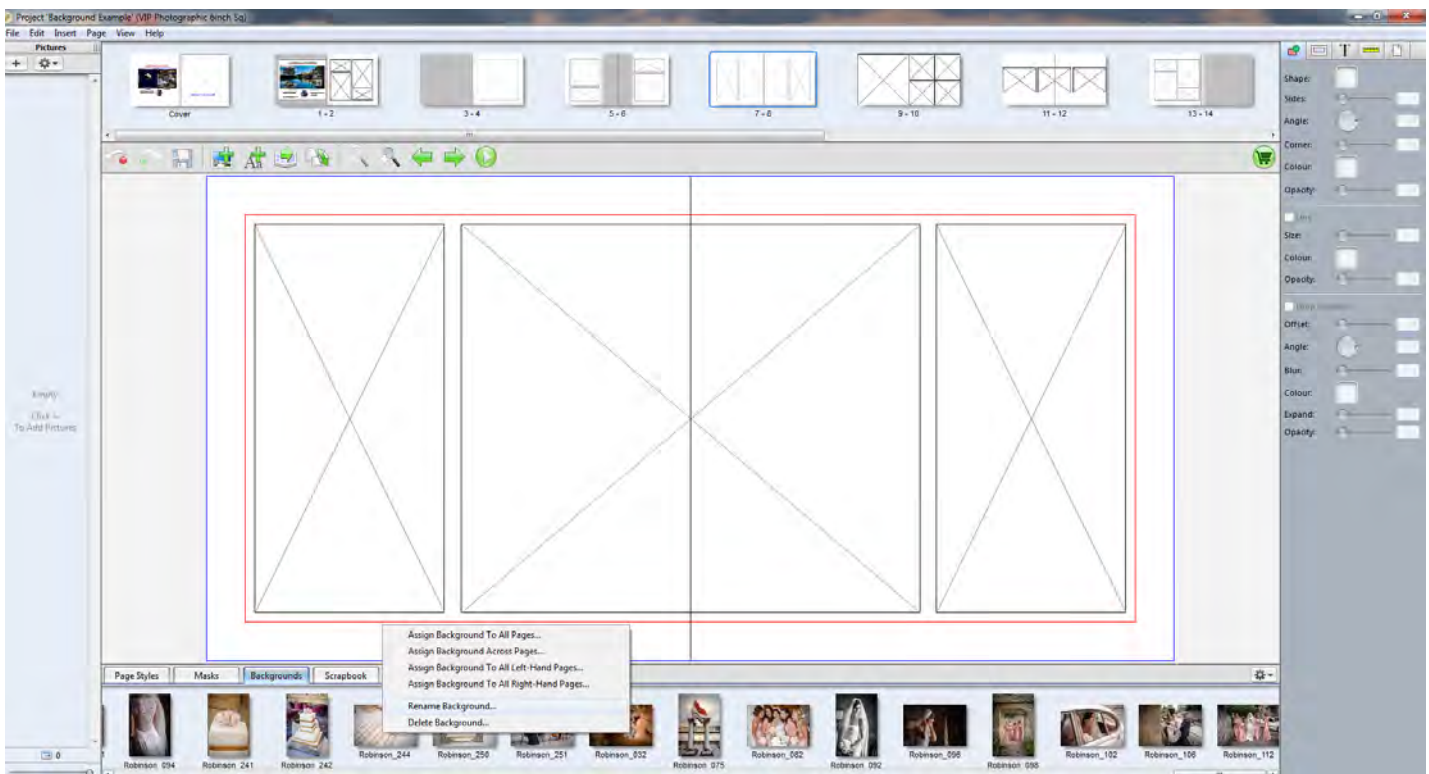

Name your new category and select 'OK'. This will now be available for you to add more backgrounds into.

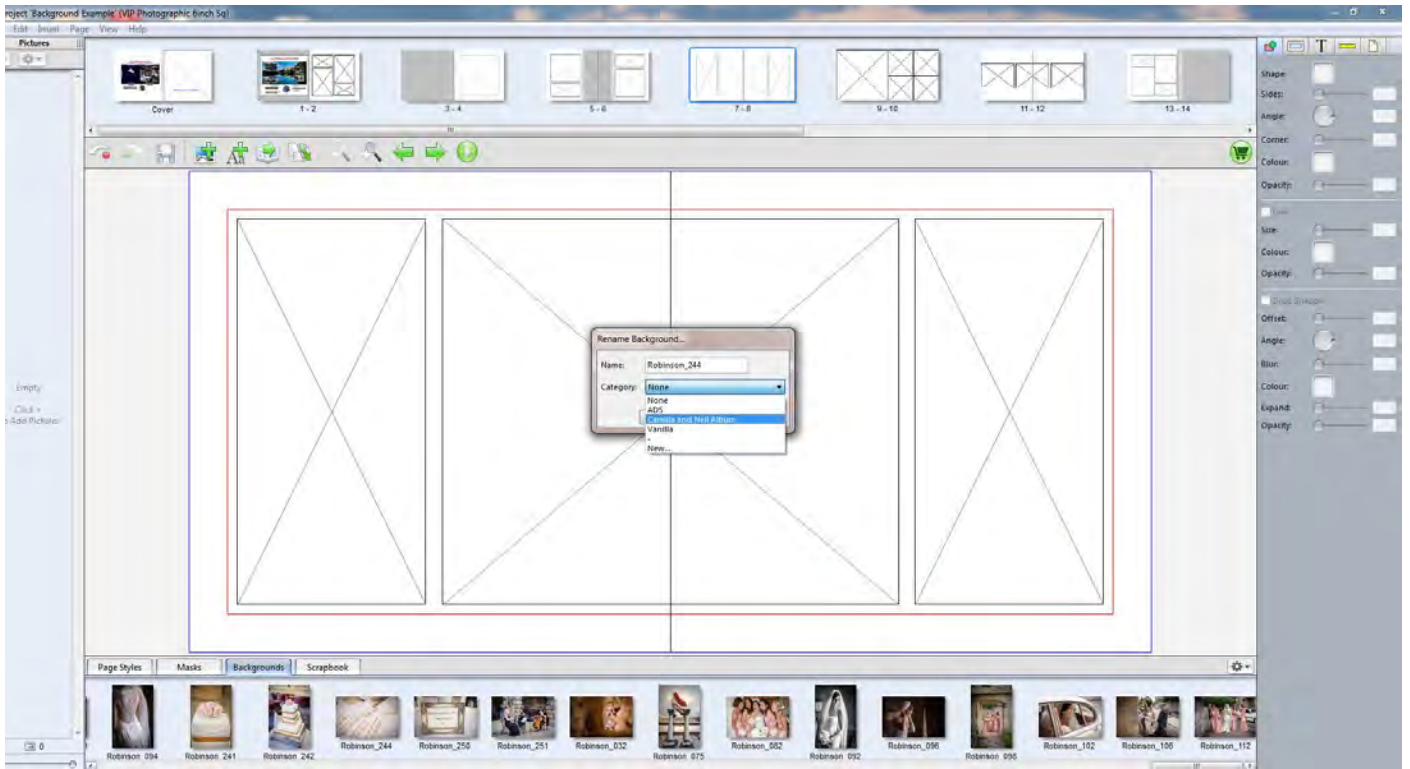

To view your new category backgrounds only click the grey clog symbol and select 'Category', a list of your categories will then show up. Click on the one you would like to use.

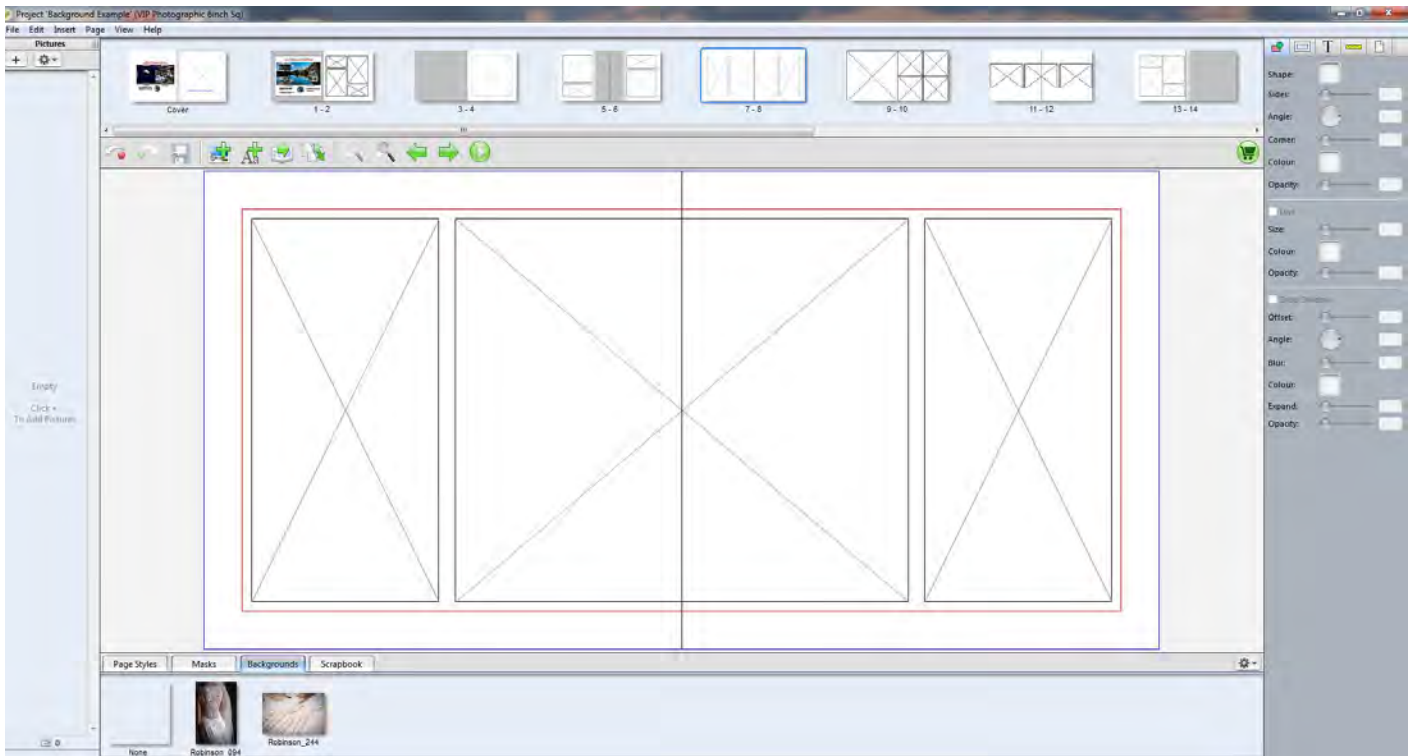

Now you can view your backgrounds by category, making the creation process quicker and easier.

If you have already imported your backgrounds without selecting a category, then you can right click on the background you would like to categorise and select 'Rename Background'

Now to can reselect the desired category for this background.
